

ECO SHIMS

FOUNDED IN 2008

SHIMSMART.COM

Eco-Shims manufactured by American Molding Technologies (AMT Plastics) are high performance, environmentally-friendly shims designed for various industrial and commercial applications. These shims are typically used in **construction, machinery alignment,** and **product assembly** to provide precise leveling, spacing, or support.

The key advantages of Eco-Shims include:

Environmental Sustainability: Made from eco-friendly materials, reducing the carbon footprint and waste associated with traditional shim manufacturing.

Durability: Designed to withstand wear and tear in tough applications, Eco-Shims offer long-lasting performance.

Customizability: Available in a variety of sizes and thicknesses to meet the specific needs of different industries and applications.

Precision: Manufactured with exacting standards to ensure reliable performance and accuracy in leveling or alignment tasks.

Eco-Shims are part of AMT's broader commitment to innovation and sustainability, combining cutting-edge manufacturing techniques with a focus on reducing environmental impact in all aspects of their production processes.
